- Editing
- Implementation

The audio and visual Imaging of your company or product can be a lengthy and time consuming task. By taking advantage of our experienced creative team you can be sounding and looking great and standing out in time for your big launch. It's not just about what you have to say anymore, it's more about how you say it.

We have a wide selection of voice over artists that will meet all needs and styles. We also offer foreign language services for a number of countries and we are also mindful of dialects, so you will not have to worry about the locals.

If you have a message to get across then this is the way to do it. From your website or as a free download from iTunes or other download sites, these audio packages are transferable to mp3 players, laptops and even your phone.

Much the same as the audio podcasts but with one obvious difference; pretty pictures to look at! Video podcasts are becoming the main force in viral PR and boosting web site traffic statistics.

A must for companies with employee training needs or instructional products this package can be supplied in video or flash or a mixture of both.

This section is a little more involved than most as it resembles a mini advertising campaign. But like the video podcasts it has proven to be a powerful web based tool for getting your name and your message across. In fact clever campaigns have often built up there own 'cult' following on the internet and have reached global infamy with millions of people downloading and talking about them.
